

Nguyễn Minh Huy : CNTT 1: 1350080094.

MT2:

```
interface Shape {  
    void getArea();  
    void getPerimeter();  
    void draw();  
}
```

```
class Rectangle implements Shape {
```

```
    Double Double width;  
    Double height;
```

```
    public Rectangle (double width, double height) {  
        this.width = width;  
        this.height = height;  
    }
```

```
    @Override
```

```
    public double area() {
```

```
        public void getSize();
```

```
        return
```

```
    }
```

```
    @Override
```

```
    System.out.println("The area of this  
rectangle " + (length * width))
```

② Override

```
public void perimeter ();  
return 2 * (width + height);  
}
```

```
public void setSize (double width, double  
height) {
```

```
this.width = width;  
this.height = height;  
}
```

```
public boolean isSquare () {  
return width == height;  
}
```

② Override

```
public void draw () {
```

```
System.out.println ("Draw Rectangle");  
}
```

```
}
```

```
public class Circle implements Shape {
```

```
private double radius;
```

```
public Circle (double radius) {
```

```
this.radius = radius;
```

```
}
```

HÒA BÌNH

(a) Override

```
public double get Area () {  
    return Math.PI * radius * radius;  
}
```

@ Override

```
public double get Perimeter () {  
    return 2 * Math.PI * radius;  
}
```

@ Override

```
public void draw () {  
    System.out.println ("Draw Circle");  
}
```

```
public class Main {
```

```
    public static void main (String [] args) {
```

```
        Rectangle r = new Rectangle ();
```

```
        Circle c = new Circle ();
```

```
        r.draw ();
```

```
        System.out.println ("Area : " + r.get Area());
```

```
        System.out.println ("Perimeter : " + c.get
```

```
        c.draw ();
```

```

    System.out.println("Area : " + C.getArea());
    System.out.println("Perimeter : " + C.getPerimeter());
}
}

```

NT 3:

```

class Hang Gan Xuat {
    public String ten Hang Gan Xuat;
    public String Ten Quan Co Gioi;
}

```
